

Grupo CPFL Energia boosts energy generation

WITH HXGN EAM

About the company

CPFL Energia generates, distributes, and sells electric and renewable energy solutions to more than 9 million customers in Brazil's residential, industrial, and commercial sectors. As Brazil's third largest electric utility, CPFL looked to standardize operation and maintenance activities across dozens of locations by implementing a single, unified solution. To learn more, visit www.cpfl.com.br.

Challenges

- Optimize the maintenance sector and operations
- Improve internal workflows to drive efficiency
- Automate and standardize all processes

Benefits

- Enhanced reliability
- Integration of maintenance, operations, and administration areas
- Increased generation capacity with competitive price
- Overall improvements in asset management
- Increase in customer satisfaction
- Improvements to plant safety and operations

"At Campos Novos and Barra Grande hydroelectric power plants, the greater operational efficiency generated better and more efficient asset management. We don't use a monetary metric to evaluate the systems, but we have seen better results in production using technology. Today it's much easier to obtain specific information, to create and customize KPI reports."

André Gonçalves da Silva,
Electric Maintenance Coordinator,
Usina Campos Novos, CPFL
